

BRIDGETON COVERED BRIDGE

1868 - 2005

Our beautiful covered bridge was burned by arson April 28, 2005. The community is in the process of building a new covered bridge. All the trees, sawmilling, blueprints, engineering, architecture and more have been donated. Hundreds of folks have offered to help.

The only thing more beautiful than a Covered Bridge Over a Waterfall is a wonderful group of folks working together to rebuild it. We cannot rebuild 137 years of memories. But, we can build a new Bridgeton Covered Bridge for future generations.

Come and see history in the making. We plan to build the new covered bridge in the summer of 2006. Don't miss it! !

For updates, donations and photos of the building progress go to
